BUILD-02
Pole Buildings

For years, Spokane County has used its Technical Information Bulletin “B-14” entitled “Pole Buildings” with a degree of success. The purpose of this policy bulletin is to allow the design of pole buildings in accordance with the above-referenced County Policy. Note the following:

1. There are maximum limits to building area, bay spacing, width, and sidewall height. Buildings that exceed these limits shall have engineered plans.
2. Purlin spacing and size are to meet building code requirements (span tables may be used).
3. The form shall be completely filled out by the applicant.
4. All Current Planning (Zoning) requirements relating to position on lot, height and size must be met.

Trusses are to be engineered, and specifications and drawings for such shall be on site at framing inspection.
