Inspections - Scheduling

How do I schedule an inspection?

On the day that you want your project to be inspected, call the appropriate inspector(s) (Building and Plumbing, Electrical and Mechanical, Boiler, and/or Elevator) between 7:30 a.m. and 8:30 a.m. Monday through Friday. The name and phone number for your inspector are provided on each permit. Be ready to give your inspector the address and the permit number, and be ready to have the premises open and available for inspection. Inspectors and their phone numbers are listed here. For general information, call 625-6300.

Inspector Supervisor
